## UV-10 CURING RETRO-FIT SYSTEM

The UV-10 system incorporates US craftsmanship in the power systems used on:

- SA-102 UV automatic bottle/jar/tube screen printer;
- RUV-112 UV automatic tube/jar/aerosol cap screen printer;

The system consists of:

- (1) UV-10 power system 18" W x 22" L x 18" ht.;
- power requirements: 220V 1-phase / 208V 3-phase / 230V 3-phase;
- dry contacts to connect to existing e-stop(s);
- dry contacts to connect to remote standby;
- dry contacts for external blower;
- 24V power supply for all switches;
- (1) UV-10 lamp system;
- (1) UV-10, 10" length bulb 400 WPI;
- (1) heat cover with chimney for exhaust;
- (1) manifold with pin connections for UV;
- (1) set of UV interface cables;
- (1) valve & manifold to operate shutter system at 20 PSIG.

**NOTE: Units DO NOT create radio frequency & may be used in operations where other electronic machinery & operations are located.**

**Units ARE NOT microwave systems, & not subject to new or existing microwave regulations on exposure for human beings.**
